

Arlanda Airport passenger terminal expansion

Strongly growing air traffic and the Schengen agreement coming into force created pressure to expand the Arlanda Airport.

Strongly growing air traffic and the Schengen agreement coming into force created pressure to expand the Arlanda Airport, which is trying to compete for the control of Scandinavian air traffic.

Ruukki was chosen to realise the expansion project because of its capacity, reliability and previous deliveries. After smooth deliveries for the first phase, Ruukki was chosen as supplier also for the subsequent second and third phases.
