

Jumbo shopping centre

The enlarged Jumbo shopping centre was opened four months ahead of schedule.

The enlarged Jumbo shopping centre was opened four months ahead of schedule thanks to the new ideas concerning frame structures, product model-based design and good cooperation between the partners.

There were many exceptional technical solutions used. For example, the steel frame, which Ruukki delivered and installed, was braced by a framework in which all the columns are bracing elements, and construction could be carried out more freely on the site.
