

## Obbola Boiler Plant

For the building, Ruukki delivered and installed the steel frame, secondary steel and approximately 10,000 m<sup>2</sup> of façade structures, including a complete roof, windows and doors.

The Obbola boiler plant in Umeå, Sweden, was recently equipped with a new recovery boiler - an investment worth approximately EUR 60 million.

Thanks to the company's experience in similar process industry projects, Ruukki was chosen as the main supplier.

For the building, Ruukki delivered and installed the steel frame, secondary steel and approximately 10,000 m<sup>2</sup> of façade structures, including a complete roof, windows and doors.

Ruukki supplied around 1,500 tons of steel.
