

Skoghall Recovery Boiler

For the Skoghall recovery boiler building, in Karlstad, Sweden, Ruukki proposed an all-inclusive solution comprising a frame, roof structures and façades. Ruukki delivered and installed the massive steel frame, as well as the prefabricated roof and façade elements that enabled completing the building within a shorter time period than scheduled, in spite of weather conditions.

Partneři

> Kvaerner

Constructing recovery boiler buildings for the paper industry is one of Ruukki's areas of expertise. Together with partner Kvaerner, Ruukki has been involved in numerous projects, both in Sweden and around the world.
