

ZM Skiba

The Skiba Meat Company is one of the most dynamically developing companies in the Polish meat industry. Ruukki participated in the expansion of company's facilities and delivered SP2B PU and SP2E PU sandwich panels with a polyurethane core. Panels were used for the construction of processing halls, cold storage halls and freezers. In total, Ruukki delivered about 25 000 m² of panels.

The Skiba Meat Company is located in Chojnice, Poland. Since its beginning in 1991 the company's main motto has been to continuously care for the quality of its products, to maintain the best traditions of meat processing and to care for natural environment.

The Skiba Meat Company is one of the most dynamically developing companies in the Polish meat industry. Ruukki participated in the expansion of company's facilities and delivered SP2B PU and SP2E PU sandwich panels with a polyurethane core. Panels were used for the construction of processing halls, cold storage halls and freezers. In total, Ruukki delivered about 25 000 m² of panels.

With their low thermal conductivity ratio and airtight joint design, Ruukki's sandwich panels with a polyurethane core are perfectly suitable for cold storage facilities.
