

Facade products

Product description

Rainscreen panel RSP600

Ruukki offers a versatile selection of Rainscreen panels. Rainscreen panel RSP600 (Cor-Ten) is made of weather-resistant sheet metal bent at all four sides. Panels, complete with accessories, form a fully finished and accurately dimensioned facade cassette system which, upon full patination of the Cor-Ten steel, provides a high quality facade finish.

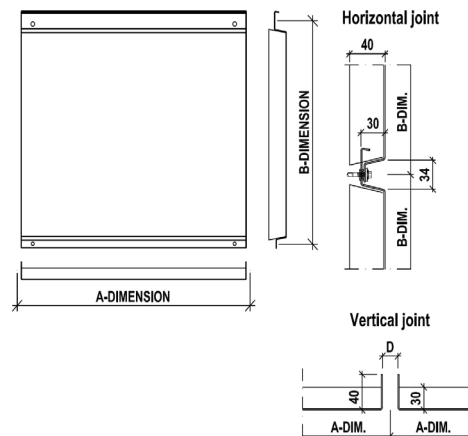

Rainscreen panels are always designed according to the project-specific dimensions. There are recommended sizes on the panels. There are three dimensions: width, height and depth. The width of the vertical joint must also be specified in the order.

Rainscreen panel RSP600 is available with visible fixings. Special panels, such as pitched or corner cassettes, are also available.

Product applications

- office construction
- public construction
- industrial construction
- warehouse construction
- renovation construction

Ruukki is a metal expert you can rely on all the way, whenever you need metal based materials, components, systems or total solutions. We constantly develop our product range and operating models to match your needs.

● **Product**

Rainscreen panel RSP600

● **Dimensions and other information**

Min. and max. A- and B-dimension according to Rainscreen panel recommendation charts on sizes
 Depth of panel (C): 30 mm
 Joints of panel (D):
 horizontal 34 mm, vertical 10 - 30 mm

Fixing holes round 10 / 8 mm

● **Fixings**

Self-drilling screws

● **Dimension and shape tolerances**

According to RT 82-10429 E

● **Materials**

Steel S355J0WP-COR-TEN A
 Material thickness 1.50 mm
