

**Ruukki in cabins and components**

**Unique design and fabrication  
expertise to your support**

**Use our skills for your benefit.  
Optimise your supply chain and production process.**

**Solutions that increase profitability**

**Increase your efficiency**

Ruukki is a reliable system and component manufacturing partner that supports your business internationally. We offer you total delivery from a single and competent source and support your business throughout the manufacturing process.

We empower your business targets by offering unique design and manufacturing expertise. From us, you will get support in all your processes: R&D, manufacturing, supply chain management, logistics and product life cycle management.

**Improve your productivity**

Add features to your products that improve your customers' productivity. Together we can develop your equipment to be lighter, last longer, perform better or be environmentally friendlier and more energy-efficient.

We have the capacity to support your company throughout the production process from design to end-user delivery. Inviting us to take a bigger role in your supply chain improves your ability to concentrate on serving your customers better.

## Examples of Ruukki's deliveries

### Add value to your processes

Ruukki provides systems and components to increase your productivity and to simplify your supply chain. We deliver custom-designed, ready-assembled and tested systems and components which can be fitted directly to your end products increasing your own operational efficiency.

We can also support you in utilising wear-resistant and high-strength steels to increase product performance and extend the life cycle of components.

### Reliability and flexibility

Ruukki supplies a wide variety of industries and is experienced in flexibly meeting customer demands. We play a part in the production of thousands of mobile machines in goods and container handling, construction and transportation industries every year.

The high quality of our operations and logistics ensure the accuracy, reliability and flexibility of deliveries. You will get the products exactly where you need them at exactly the right time.

**Increase your productivity**

## Support throughout the value chain

### From design to delivery

We have the capacity to support you throughout the production process from design and development to delivery to end-user. We have the means to simplify your current supply chain and take a strong role as your partner in system and component supply.

Ruukki's bigger role improves your ability to concentrate on serving your customers better. Our design expertise, delivery accuracy and operational possibilities make it possible for you to better fulfil the expectations of your customers.

### From steel production to final assembly

Metals have been our business for decades. With our wide resources and own production, we are able to continuously research the behaviour of steel in different conditions.

We can turn years of steel know-how and comprehensive industry experience into concrete product benefits.

## Add strength and experience to your actions

### Ruukki Engineering

### Supplier of choice

Ruukki's international manufacturing network - with units in Finland, Central Eastern Europe and in China - guarantees reliable system and component supply globally. We have the ability and resources to support your company's different processes and needs across geographical boundaries.

We have one, certified global way to operate with reliable, consistent and flexible deliveries from all our units. Our strong capacity and market presence ensures the best service when you need it.

Talk to us about your needs in product development and optimising manufacturing - we will find the best solution.
