

Anti-condensation noise-reducing felt

The Classic roof can be produced also as „RUUKKI Silence“ type with additional felt on the under-side. This option ensures noise reduction of 6 db and reduces also the condensation effect at the bottom of the Classic roof.

Accessories

Accessory is available in the same material like the CLASSIC roofs and have the same qualitative properties. This accessory is fastened with self-drilling screws in same color, with a water-proof and a wear-resistant seal. In addition to an extensive range of accessories it is also possible to order custom fittings. Also various original leads-in parts is possible to install according customer’s needs.

RUUKKI
Building your tomorrow.

Tough but beautiful

Ruukki Classic is a high-class steel roof with unique look. Its profile resembles traditional seamed roofing but at the same time it's modern and stylish. It suits a variety of architectural styles and it is an excellent choice also for low-pitched roofs. If you are looking for timeless and long-lasting beauty, choose Ruukki Classic. It's tough and easy-care.

Innovations in classic design

RUUKKI CLASSIC is excellent because of its simplicity and timeless solutions for every roof. It meets the idea of classic home and contemporary architectural styles. RUUKKI CLASSIC is characterized by straight lines and harmonious forms on the surface and hidden anchors that do not disturb the unique appearance of the roof. RUUKKI CLASSIC is suitable for roofing as well as for wall cladding.

The technical quality relates to the mechanical functionality of the product. We guarantee that the Classic roof stay intact during a guarantee period. The aesthetical quality relates to the durability of the color on the outside part of the product. We guarantee the coating and the color of the product during the granted warranty period will show no wear. The warranty is subject to the warranty provided by RUUKKI sales terms and conditions.

Let us introduce GreenCoat®

GreenCoat® stands for innovative, eco-conscious colour coated steel sheet solutions boasting excellent colour retention and long usable life. The material has been developed for use in building construction and other uses. All products are based on Nordic top quality

steel which is recognized worldwide as one of the best steels available on the market. On top of this, most of the GreenCoat® products feature a Bio-based Technology (BT) surface coating with a substantial portion of the traditional fossil part replaced by biocomponents.

Greener, better – superior quality steels and bio-based material coatings

Products made of GreenCoat® Nordic quality offer great environmental advantages. They can boast the highest parameters thus contributing to lower ecological burden and improved sustainability of the buildings. While colour coated steels are available as chromate-free products only, GreenCoat® goes even further. Therefore most of the GreenCoat® products feature a Bio-based Technology (BT) coating with a substantial portion of the traditional fossil part replaced by biocomponents. This unique patented solution radically reduces the ecological footprint of GreenCoat® products. Thanks to the innovative colour design, 100% recyclability and conformity with the REACH

regulations as well as a range of various environmental certificates GreenCoat constitutes an ideal sustainable solution for buildings. GreenCoat® products are highly resistant to corrosion, UV radiation as well as scratches. They offer an extensive guarantee based on 40 years of testing in outdoor environment. They provide builders with a lightweight material that is easy to work with even down to -15°C. GreenCoat products are available in a whole range of attractive colours and surface finishes. In every possible climate on Earth GreenCoat® helps to build innovative, durable and economic buildings – for greener living.
