

Ruukki Classic LowCarbon

Choose a roof with a lower carbon footprint

Ruukki Classic® LowCarbon combines the design and proven quality of Ruukki Classic with a lower carbon footprint. The product more than halves embodied carbon compared to the standard product.

The lower embodied carbon is achieved through material choices and energy- and resource-efficient manufacturing. Ruukki Classic LowCarbon is made using recycled-based SSAB Zero™ steel. For detailed information on the product's carbon footprint, see the Ruukki® LowCarbon pages and product-specific EPDs.

We continuously work to reduce emissions throughout our operations by improving energy and resource efficiency, using lower-emission raw materials and energy sources, and reducing emissions from packaging and logistics. We have systematically tracked and reduced emissions since 2020. Ruukki Construction's operations are certified according to ISO 9001, ISO 14001 and ISO 45001.

Be among the first to support the transition towards lower-carbon construction!

Ruukki Classic LowCarbon is a premium product that is available with a 50-year technical warranty

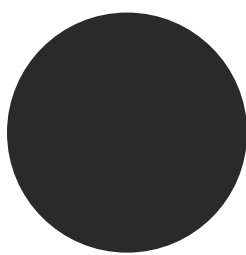

REQUEST QUOTATION

Properties

Product code	SR35-475C
Seam Height	32 mm
Effective width	475 mm
Total width	512 mm
Maximum length	10000 mm
Minimum length	1000 mm
Material thickness / weight per m2	0.5 mm / 5.2 kg
Sales unit	m ²
Minimum Slope Distance	8°

Coatings and colors

RR2H3 Anthracite
