

Ruukki Classic M

The micro-profiling of the Ruukki Classic M covering is a new method of surface treatment that underlines the modern and elegant appearance of the roof and contributes to the strength of the roof covering as a whole.

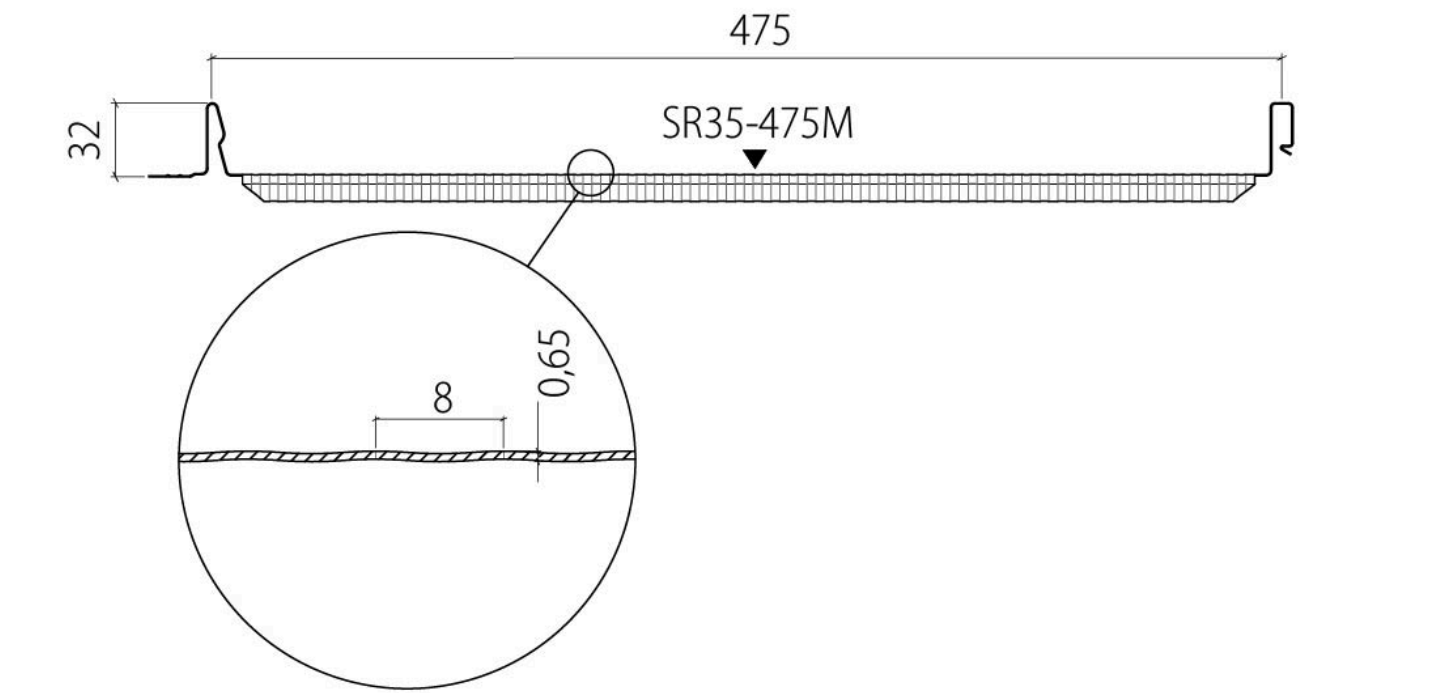

Microprofiling can only be applied to the Ruukki Classic M covering in all three quality classes Ruukki 50, Ruukki 40 and Ruukki 30, but it cannot be combined with anti-condensation treatment.

Please note that the color RR22 is only available in Ruukki quality class 50
