Sandwich panel **SPA E LIFE Energy** is available in thicknesses 150 - 230 mm.

It ensures **excellent air-tightness** and **energy efficiency**. The application of special solutions with structural details and assembly services provided by skilled and certified contractors enable to **decrease energy costs** of the building and its **CO2 emissions up to 20%**.

With its exceptionally high recycled content, this sustainable sandwich panel minimises the use of raw materials and energy as well as reduces the carbon emissions during the construction phase. Our life panel can be **re-used and fully recycled**. It is an ideal solution for facades with high requirements for sustainability.

Using Ruukki’s solutions you can receive more credits in LEED and BREEAM certification systems. This panel type is **intruder resistant** in accordance with SSF 1047, class 2 (see Certificates & approvals).

The filling consisting of non-combustible and environmentally friendly soft mineral wool with low thermal conductivity coefficient ensures **very good thermal insulation** of this panel. Properly milled core increases air-tightness and provides **high sound insulation**.

**Application:**

- External walls (standard fix)

*) optional material

**UV resistance** describes how well the coating is able to keep its original colour and gloss levels in accordance with EN10169. The higher the class, the better the resistance.

**Corrosivity categories** describe the outdoor climate conditions in accordance with EN12944. The higher the category, the more corrosive environment.

*Read more about UV-resistance and corrosivity categories.*

**PROFILE OPTIONS**
To make both architectural and structural design work easier, with accurate product information in 3D form, we offer a selection of CAD / BIM-objects and software tools, which can be downloaded from the Software Toolbox portal.
READY MODELLED BIM OBJECTS
Download objects for ArchiCAD
Download objects for Revit

SOFTWARE TOOL TRAYPAN FOR CHOOSING THE OPTIMAL PANEL TYPE
User-friendly TrayPan software takes into account load, temperature, span, U-value, fire resistance and acoustics. TrayPan contains two user interfaces:
- Optimisation tool for quick and easy pre-selection
- Designer version for detailed structural analysis.

LOAD & SPAN TABLES FOR DIMENSIONING PANELS AGAINST LOADS
ACCESSORIES

Accessories for sandwich panels include flashings, fasteners, gaskets, and sealing flanges.

These accessories ensure fast assembly, fastening reliability, joint tightness, and aesthetic improvement. They are suitable for external and internal wall surface construction, as well as roofs - for construction projects of various sizes at any destination.

INSTRUCTIONS

ASSEMBLY INSTRUCTIONS

Assembly instructions document includes information about:

- Packing
- Transportation and unloading
- Storing
- Assembling

MAINTENANCE INSTRUCTIONS

Maintenance instructions document contains information about:

- Washing
- Painting
PRODUCT DESCRIPTIONS

Product description includes information about:

- Panel structure
- Structural dimensioning
- Panel packaging
- Windows and corner panels
- Panel fastening

FACADE CLADDING INSTRUCTIONS

Ruuksi Forma design instructions explain how to design façade cladding systems on top of Ruukki sandwich panels.
