Sandwich panel SPA E Life for external wall

Sandwich panel **SPA E Life** is available in thicknesses 150 - 230 mm.

With its core made of recycled glass, this sustainable sandwich panel minimises the use of raw materials and energy as well as reduces the carbon emissions during the construction phase. Our Life panel can be **re-used and fully recycled**. It is an ideal solution for facades with high requirements for sustainability.

Using Ruukki's solutions you can receive more credits in LEED and BREEAM certification systems. This panel type is **intruder resistant** in accordance with SSF 1047, class 2 (see Certificates & approvals).

The gaskets integrated in the joint provide reliable airtightness of the panel as a standard. For maximum performance of the wall as a whole upgrade to the full Ruukki Airtightness package including dedicated details and accessories.

Read more on airtightness package.

The filling consisting of non-combustible and environmentally friendly soft glass mineral wool with low thermal conductivity coefficient ensures **very good thermal insulation** of this panel.

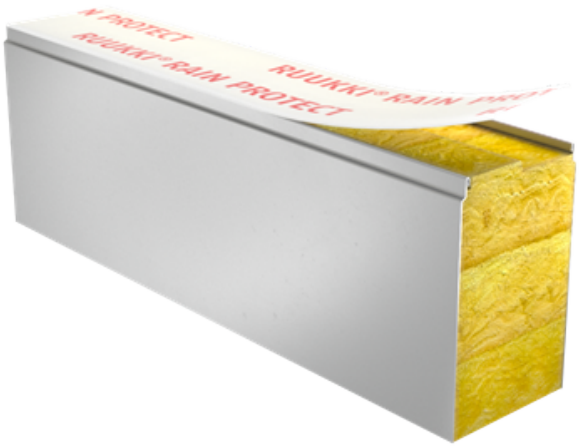

Application:

- External walls (standard fix)

Ruukki® LowCarbon

Also available as Ruukki® LowCarbon, helping to reduce embodied carbon and made with high recycled content. See the Ruukki® LowCarbon pages and product-specific EPDs for details.

The optional Ruukki Airtightness package improves building airtightness, helping to reduce energy consumption and CO_2 emissions during the use phase.

Design tools

Traypan® software for designing sandwich panels

With TrayPan®, you can design metal faced sandwich panels made by Ruukki. A panel structure can be designed as a single- or multi-span construction. You can easily give, with a few parameters, both suction and pressure loads caused by the wind. The application also calculates the necessary fasteners.
