

# Sandwich panel SPA E Life for external wall

Sandwich panel **SPA E Life** is available in thicknesses 150 - 230 mm.

With its exceptionally high recycled content, this sustainable sandwich panel minimises the use of raw materials and energy as well as reduces the carbon emissions during the construction phase. Our Life panel can be re-used and fully recycled. It is an ideal solution for facades with high requirements for sustainability.

Using Ruukki's solutions you can receive more credits in LEED and BREEAM certification systems. This panel type is intruder resistant in accordance with SSF 1047, class 2 (see Certificates & approvals).

The filling consisting of non-combustible and environmentally friendly soft mineral wool with low U-value ensures very good thermal insulation of this panel. Properly milled core increases air-tightness and provides high sound insulation.

## **Application:**

- External walls (standard fix)

The upper face of the panel includes a Ruukki® Rain Protect membrane that will prevent the insulation from getting wet during installation (panel thickness 150-230mm).

## **This product is optionally available with following sustainable features:**

- Steel facings made of recycled steel (SSAB Zero) for significantly lower CO<sub>2</sub> emissions and high circularity (Ruukki LowCarbon)
- Insulation made of recycled glass for high circularity
- Air tightness package for lower CO<sub>2</sub> emissions during building use

## Design tools

### Traypan® software for designing sandwich panels

With TrayPan®, you can design metal faced sandwich panels made by Ruukki. A panel structure can be designed as a single- or multi-span construction. You can easily give, with a few parameters, both suction and pressure loads caused by the wind. The application also calculates the necessary fasteners.

### Download BIM objects to your desktop

ProLib brings Ruukki products as BIM models directly to your desktop in 3D form for design programs AutoCad, Autodesk Revit, Archicad and Tekla Structures. Product libraries compile all necessary design models and detailed drawings in one place. Library updates are automatically notified, so as a user you can be sure that your product information is consistently up to date. ProdLib can also be used as a standalone desktop application.
