

# Agricultural Machinery Trading Company EWA

EWA, a Lithuanian-owned company, is among the largest agricultural machinery traders in Lithuania. In 2025, the company inaugurated its modern headquarters in Sausinė village, Kaunas district, conveniently located near the Kaunas–Klaipėda highway. The facility hosts EWA's administrative offices, a customer service center, and a machinery maintenance hub. For the new building, Ruukki supplied SP2E E-PIR, nSPB WE, and nSPB W sandwich panels – along with the elegant Design Venice™ S10 façade cladding profiles. The vertically corrugated façade panels add a striking sense of height, beautifully complementing the horizontal lines of the sandwich panels.
