The cladding of steel cassettes for facades of public buildings ensures longevity and resistance to possible external damage. The project includes interesting solutions such as the use of cassettes in the decoration of the roof eaves and the decoration of the entrance gate with diamond-shaped cassettes.

- Product: Ruukki Liberta Elegant 500; HIARC RR40; HIARC RR45; PP RAL9005
- Year: 2022-2023
- Total area of the facade: 2500 m²

In this building we have used GreenCoat® - A Nordic quality sustainable steel from SSAB.
