

Apartment building on Radyňská Street in Pilsen, Czech republic

The apartment building on Radyňská Street in Pilsen replaced two demolished houses. The facade of the new building consists of perforated design profiles Design Cor-Ten S7 from Ruukki, which give it a regular and minimalist touch.

- > Year: 2019

The new construction of the apartment building on Radyňská Street has replaced two demolished houses, which are, however, still recognizable in the mass of the new building. The construction works took place from autumn 2018 to spring 2020. It is a simple building with a non-traditional and expressive solution that attracts your attention and inspires. The building was nominated for the Building of the Year of the Pilsen Region 2020 and won the award of the Regional Chamber of Commerce in the Pilsen Region.
