

## Commercial – Melleruds Handel, Mellerud, Sweden

Melleruds Handel is a shopping center in Mellerud in Västra Götaland County, Sweden. Ruukki supplied the sandwich panels used in the wall and the load-bearing profiled sheets. Besides the sandwich panels, Ruukki supplied the perforated Liberta 500 rainscreen panels used in the façade. The shopping center was opened in October 2019.

As well as the panels and load-bearing profiled sheets, Ruukki also provided support to the customer in designing the required stiffness of the roof surface.

“Ruukki’s part in the project went perfectly and I’m very pleased with the end result,” says Leif Broberg at Brålanda industri.

The shopping center customer wanted to give the building an eye-catching golden façade on the main entrance side. The building’s owner, architect and Skanska chose Ruukki to supply the façade part.

“I think the outcome is good and also the customer is pleased,” says Erik Carlsson at Skanska.
