

Tibnor distribution centre in Norway

“Ruukki has very high-quality products, they can be quickly installed and the price was also right. All in all I’m very pleased with the project. The building was completed to schedule and teamwork between all the actors was exemplary,” says Finn Kamås, Logistics and production director at Tibnor.

Tibnor's new main warehouse in Norway opened in June 2019. The building has been designed to serve the business well and to be a pleasant workplace for the 65 Tibnor employees who work there. Tibnor is a Nordic supplier of steel, other metals and processing services. Tibnor is part of SSAB and besides the Nordics also operations in the Baltics.

Ruukki supplied the load-bearing roof structures and the sandwich panels for the walls. Ruukki also provided the calculation of the roofing required and the installation drawings.
