

Wholesale and logistics company – Entafarma, Širvintos, Lithuania

Entafarma is a Lithuanian wholesale and logistics company for pharmaceuticals and medical products. The company is located about 30 km from the capital Vilnius next to the busy A2 motorway. The most recent extension of the premises was completed in April 2020. Ruukki supplied the sandwich panels used in the wall of the building and load-bearing sheets used in the roof.

“Sandwich panels allow premises that comply with the regulations to be constructed to a tight schedule. They also deliver savings in energy bills, in heating and cooling costs,” says architect Romualdas Grabauskas from architects RV Grupė.

“Ruukki is a reliable company and we are pleased with the end result,” says Tauras Endriukaitis, President and CEO of Entafarma.
