

Esport Arena sports hall

We delivered 2,500 m² of perforated Ruukki® Design Rome S34 facade cladding profiles to the Esport Arena. The delivery included participation in design with the architect and owner at an early stage to find the optimal solution for the customer through collaboration.

Esport Arena is a privately owned multi-purpose sports arena at Koivu-Mankkaa in Espoo, Finland. Built in the 1970s, the arena's facade renovation was completed in the spring of 2018.

The renovation freshened up the entire building. Large athlete figures have been created on the facade surface with modern perforation technique. They highlight the building's intended use
