

High-Bay Warehouse Kostrzyn

The investor decided to choose Ruukki as a partner in HBW construction because the company offered optimal solutions concerning both the design and the applied materials.

Partners

Customer: ICT Poland

ICT Poland built in Kostrzyn one of the most modern logistics centers in Poland.

High-bay warehouse in ICT Poland has capacity for 60 thousand pallets on 12 floors, and its loading space occupies 16 000 m². The building is 35 m high.

The investor decided to choose Ruukki as a partner in HBW construction because the company offered optimal solutions concerning both the design and the applied materials. Ruukki's work scope included **roof and wall cladding** made of **liner trays** in horizontal system and **profiled sheets** in vertical system with insulation, together with necessary flashings and fasteners, as well as works related to a roof and external walls, such as smoke vents, roof drainage, lightning system and fire doors.
