

Kalnėnai Shopping and Leisure Complex, Lithuania

The Kalnėnai Shopping and Wellness Center is a place in Vilnius' Kalnėnai district where visitors can enjoy convenient shopping, family-friendly services, and activities that promote well-being. Spread across more than 9,000 square meters, the complex includes a shopping center, swimming pool, various sports facilities, medical clinics, and dining options—everything needed for comfortable living and an active lifestyle. For this project, Ruukki supplied SP2E E-PIR and nSPB W sandwich panels and manufactured over 12,000 linear meters of bespoke Lamella cladding strips for the center's exterior. The distinctive combination of colors and HIARC-coated lamellas gives the façade a modern and unique look.
