

KUHN - SLOVAKIA s.r.o. - Service Branch for construction machines

KUHN-SLOVAKIA is a reliable partner in the construction and logistics industry. The company proceeded to build a new branch providing service for the entire portfolio of Komatsu, Ammann, McCloskey Intl., SBM Mineral Processing and FRD construction machines, thanks to a long-term planned modernization and expansion. Its positive growth and emphasis on the highest quality of services provided also contributed to this. The KUHN-SLOVAKIA service branch located in the Haniska part of Prešov covers the needs of customers not only in Eastern Slovakia.

Kuhn's new branch for the Košice and Prešov regions is located in the industrial zone on the area of approximately 5,000 m². There are modern premises at the highest level - offices, service hall, spare parts warehouse and outdoor washroom. Ruukki supplied a complete envelope consisting of sandwich panels with a 120 and 200 mm thick mineral wool core in silver and orange.
