

Motorcenter Oulunkylä

Using Ruukki's products, the commercial building was made to be a lot more aesthetically pleasing than normal. For the western side of the building, Ruukki supplied Liberta Glass White façade covering with the southern side of the building having white Design Tokyo façades.

Motorcenter is a commercial building located in the Oulunkylä district of Helsinki on the Kehä I ring road that was completed in 2018. Motorcenter is a service centre for motorists that has, for instance, vehicle inspections, car washing and hire services, and fast food restaurants.

Using Ruukki's products, the commercial building was made to be a lot more aesthetically pleasing than normal. Ruukki supplied the Sandwich panels that decorate the building's walls, to a total of around 3,000 square metres. The panels were installed vertically and the upper fasteners were hidden using Ruukki's Invisible battens. For the western side of the building, Ruukki supplied Liberta Glass White façade covering with the southern side of the building having white Design Tokyo façades.

Motorcenter is a service concept developed by YIT, and the company is also the main contractor for the building. The building was designed by architectural office Olli Hatvala.
