

Pilana Karbid – a traditional Czech manufacturer

PILANA company is a traditional Czech manufacturer of cutting-tools with more than 80 years history. Thanks to the growth in recent years the original premises of the factory in the suburb ceased to meet the capacity and so they decided to build a new production hall and office building.

In this building we have used **GreenCoat®** - A Nordic quality sustainable steel from SSAB.

[Read more about about GreenCoat® here](#)

There was not much place in the production complex so it was demanding to take the limited space into account. Production hall was built in the first phase of the project. A three-storey office building which can be supplemented with additional floors in the future followed in next construction stage. Ruukki delivered its complete wall system Ruukki Forma® with perforated Design profiles Paris S55 for this project. Pilana production and office building was awarded by the Czech Ministry of Industry and Trade in 2020.
