A logistics centre housing Posten Norge's (Posten) and Bring, a logistics company specialising in package deliveries, was completed in March 2019 in Sandnes, to the south of Stavanger in Norway. The new logistics centre houses storage and sorting facilities, a mail terminal and offices. Posten's functions were earlier spread across the Stavanger region.

Ruukki supplied sandwich panels used in the building and the so-called system windows, which match Ruukki's panels perfectly and together create an airtight, energy-saving wall structure.

"The panel-matching windows supplied by Ruukki are ideal for buildings where the walls and entire structure are built to a tight schedule," says project manager Egil Høeg at Veidekke Logistikkbygg.
