

# Private house in Southern Estonia

The inspiration to use Cor-Ten® steel on the façade of the building came from the house of pilgrimage of the Vastseliina bishop's castle. When the house owner saw the Cor-Ten® steel façade of the building there, it was immediately clear that this was exactly what they were looking for. The striking rusty façade and the pine forest in the same shades as the background - a perfect match.

Ruukki supplied 200 m<sup>2</sup> of Liberta Cor-Ten 800 rainscreen panels, battens and all the necessary accessories.

The unique appearance of Ruukki Liberta Cor-Ten 800 panels gives the single-family house a modern and aesthetically pleasing look that fits in well with contemporary architectural trends. The rusty appearance of Cor-Ten® steel provides a strong contrast to the plastered surfaces and the natural texture of the wood. This contrast helps to bring out the unique characteristics of each material and creates a dynamic visual effect. Cor-Ten® steel requires minimal maintenance as rust protects the material from further corrosion. Installation of Liberta 800 rainscreen panels is quick and easy, saving on construction costs and time.

Ruukki's products are environmentally friendly and support sustainable construction and architecture.
