

Quality Hotel Arlanda XPO – Arlandastad, Sweden

The Ruukki® Primo cladding system has been used in the façade of the Quality Hotel Arlanda XPO hotel next to Stockholm Arlanda Airport. Ruukki also supplied the window frames made of color-coated steel and the color-coated perforated window covers.

"The idea was to create a landmark and eye catcher, which is a Nordic building. We succeeded. When we weighed up the product, price and quality, Ruukki's product came out top. We are delighted that the project went as well as it did," enthuses Jakob Ahlqvist at Explore Arlandastad.

The contractor's excellent façade competence was highly instrumental in being able to complete the special design.

"Once we learned about Ruukki's new Primo cladding system, we became interested and wanted to try it in our new building project," says Tomas Ericsson, Project manager at LIAB Plåtbyggarna.
