STOKKER, an Estonian capital company, has been operating in Lithuania for more than 25 years and has 35 shopping centres in the Baltic States. All the acquired experience was used to open a tool center that would be very attractive to customers.

The new Tool Center has over 650 m² of retail space with conveniently arranged displays, as well as a modern repair workshop for small and heavy machinery. Ruukki supplied 1000m² of SP2E 200 E-PIR sandwich panels and ~400m² of Lamella SHARP 45 facade cladding.
