

Tartu University Hospital - C & M buildings

A total of more than 33 000 m² of gross floor area was added to the University of Tartu campus between 2020 and 2023. The building complex includes the M-building, which will house the new paediatric clinic, with six floors above ground and two underground.

The four-storey building of the completed C wing houses the women's clinic family centre, a new operating theatre and an ear clinic. Construction work also included several smaller parts of the medical campus, including a new entrance to the emergency department. (ehitusest.ee)

Ruukki Liberta Cor-Ten 800 facade panels adorn the facades of the C and M wings of the hospital.
