Ruukki was trusted to supply steel structures for one of the most unique real estate projects in Northern Europe.

Partners

- Main contractor: PEAB Sverige AB
- Architect: White Arkitekter AB

Ruukki was trusted to supply steel structures for one of the most unique real estate projects in Northern Europe. Ruukki's capacity to deliver large volumes within short periods of time constituted a defining factor in the choice of a supplier. The company's technical know-how on steel structures was also of importance.

The challenging construction project consists of a steel structure with beams that are up to 15 meters high and 50 meters long.
