

DHL Business Park

The DHL Business Park project required a turn of speed.

The DHL Business Park project required a turn of speed. The DHL Business Park project required a turn of speed. Ruukki designed the first elements in April 2005, and those were delivered in May 2005. One challenge was to meet the tight technical and acoustic requirements set for the buildings located near the airport.

Ruukki delivered the frame, envelopes and roof structures. Prefabricated wall elements enabled a weather-tight envelope, quickly. The tight schedule demanded good project management and logistics.
