In this building we have used **GreenCoat®** - A Nordic quality sustainable steel from SSAB.

[Read more about about GreenCoat® here](#)

Two main materials used for the impressive facade are glass and coated steel in the form of Ruukki Liberta 500 Grande rainscreen panels with hidden fasteners. The big cassettes are not just on the facades, but also over the glass-wall on the ceiling. Two side walls with 'U' shape rainscreen panels turn onto the main facade. Similar 'U' elements decorate the red entrance too.
