SWH Grupa is the owner and manager of the Skanstes City, and is also responsible for the development of the complex.

Skanstes City is a multimodal business district complex offers 9 office buildings that have been developed through the years.

This was not the first delivery from Ruukki. We supplied facade cladding materials for this office center many years ago, and now we continued with new delivery. You can not see the difference between the old and new delivery, which demonstrates very well the durability and quality of the material.
